Two different teachers found mold behind bulletin boards when they were rearranging their classrooms. I contacted insurance. They came out and did a preliminary inspection and found a couple of issues with our roof above the old classrooms and the cafeteria. We are getting in contact with roofing companies, but do not know how much it will cost to replace the roof. The insurance policy covers \$25,000 of no fault mold, but they stated that it will likely not cover the cost of replacing the ceilings and removal of the mold.

**Project Category:** Roofing

**Are any of the above-described issues in buildings or part of buildings that are leased to another entity, including a district sponsored charter school?** Y

**Available Funding**

## Building Renewal Grant Application

The 613.82 will be going towards repairing the electrical system for the entire school. Additionally, we do have 25,000 coming from the insurance company for removal of the mold. We gained some additional capital money this year. However, we received no teacher applications from June 1st to today due to our location. The school board was looking into building teacherages with the capital money in order to retain and recruit teachers for the district. We are in the process of getting proposals for the project.
